

AKHIL MAKWANA

Full Stack Web Developer (MERN Stack)

+91 97255 62838 • akhilmakwana745@gmail.com • Ahmedabad, Gujarat • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Motivated Full Stack Web Developer with hands-on experience building and deploying responsive MERN stack web applications. Built a real-time Task Manager with JWT authentication, a MoneyTrackFlow finance app with CRUD operations, and a personal portfolio — all deployed on Render. Proficient in REST API design, React Hooks, JSON data handling, and MVC architecture. Actively uses AI tools (Claude, ChatGPT, Cursor, GitHub Copilot) to write cleaner code faster. Currently interning at Stackdot, gaining professional industry experience. Seeking a Junior Developer role to contribute and grow within a professional team.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, React Hooks, Context API, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST API Design, JWT Authentication, JSON, MVC Architecture

Databases: MySQL, PostgreSQL, MongoDB, CRUD Operations, Schema Design

Deployment: Render, Vercel, Netlify

Tools & AI: Git, GitHub, VS Code, Postman, npm, Claude, ChatGPT, Cursor, GitHub Copilot

EDUCATION

Bachelor of Computer Applications (BCA) | BKNMU, Junagadh

July 2022 – March 2025

Bhakta Kavi Narsinh Mehta University • Major: Computer Science

EXPERIENCE

Full Stack Developer Intern | Stackdot | Ahmedabad, Gujarat, India |

March 2026 – Present

- Working on real-world full stack projects using MERN stack in a professional team environment.
- Collaborating with senior developers and contributing to production-level codebases.
- Applying best practices in code quality, version control (Git/GitHub), and Agile workflows.

Full Stack Developer Trainee | StackCode Training Institute | Ahmedabad, Gujarat, India |

June 2025 – Feb 2026

- Built 3x full-stack web applications using React.js and Node.js/Express.js with REST API integration, handling 100+ records with real-time UI updates.
- Designed relational (MySQL, PostgreSQL) and non-relational (MongoDB) databases with scalable schema design and optimized CRUD operations.
- Deployed all projects on Render; maintained full version control with Git/GitHub following industry-standard Agile practices.

PROJECTS

MoneyTrackFlow — React.js, Node.js, Express.js, MongoDB — Deployed on Vercel

- Full-stack finance web app supporting 3 transaction categories (debit, credit, transfer) with real-time balance calculation across 200+ entries.
- Built REST API with Node.js/Express.js and MongoDB; React frontend uses Hooks and Context API for state — deployed live on Render.

Task Management App — Node.js, Express.js, MongoDB — Deployed on Render

- Full-stack CRUD app managing 100+ tasks with real-time status tracking, priority filters, and JWT-based authentication for secure route protection.

Personal Portfolio Website — React.js, Tailwind CSS — Deployed on Vercel

- Fully responsive portfolio with optimized load time across desktop, tablet, and mobile — built with reusable React components and Tailwind CSS.
